Exploring the Janzen-Connell hypothesis

Daniel Vedder

A wide-angle photograph of a tropical rainforest. The foreground and middle ground are filled with dense, lush green trees covering rolling hills. The forest extends to the horizon, where a blue ocean is visible under a clear sky. The text "Why are there so many tree species in tropical rainforests?" is overlaid in white, centered on the image.

Why are there so many tree species
in tropical rainforests?

The Janzen-Connell Hypothesis
